Subject: Minerals and Waste Plan Consultation-- Clanfield/Bampton

Dear Sir

I wish to object most strongly to the plan to extract gravel from this area. My reasons follow;

The road structure is unsuitable for HGVs because of narrowness of the lanes, humpback bridges over the Thames and that such vehicles are already banned from some roads.

Our environment has already been degraded by excessive and unsuitable housing developments with more to come. This would be the final blow to Bampton as a quiet rural village which is pleasant to live in and enjoyable to visit.

The filling of resultant gravel pits with water will result in waterfowl posing risk to aircraft at Brize Norton due to bird strike.

Yours sincerely,

Dr Robert Landray.
