Subject: Minerals and Wast Local Plan Update - Clanfield/Bampton area

Dear Mr Day,

We are writing to support the exclusion of the Clanfield/Bampton area from sand and gravel extraction for a number of reasons which I know have been clearly outlined by AGGROW (Anti-Gravel Group of Residents). Mainly the local infrastructure is totally insufficient and unsuitable for heavy vehicles, particularly those roads going over the bridges over the Thames. The area also has roads which run past several primary schools which with an increase in traffic could be hazardous to the children. Nothing has really changed locally since the area was found unsuitable by an inspector a few years ago.

Thank you for your consideration in this matter.

Yours sincerely

Julian and Elizabeth Stevens
