

Mineral Site SR-01/245: Challow Marsh Farm, East Challow

District: Vale of White Horse DC
Parish: East Challow CP

Total Area: 1.67 Ha

	Ha	%
Area in Flood Zone 1	1.67	100
Area in Flood Zone 2	0.00	0
Area in Flood Zone 3a with Climate Change	0.00	0
Area in Flood Zone 3a	0.00	0
Area in Flood Zone 3b	0.00	0

MAIN RIVER
The Childrey Brook flows south to north approximately 0.01km east of the site.

FLOOD RECORDS
There are historic records of fluvial flooding in Denchworth to the north of the site.

Modelling of the 1 in 100 year storm event as part of the VWHDC & SODC SFRA identifies parts of East Challow, south east of the site to be at risk of surface water flooding.

There are no reported incidents of groundwater flooding in this area.

Area in Flood Zone 3b	0.00	0

MAIN RIVER

The Marcham Brook flows north to south approximately 0.8km to the west of the site and the Sandford Brook flows north to south approximately 1.7km to the east of the site. These watercourses flow south to join the Upper Thames watercourse.

FLOOD RECORDS

25-50 properties are recorded to have experienced flooding in Appleton, west of the site, as a result of fluvial flooding associated with the Marcham Brook as well as surcharging of surface water sewers.

Thames Water has records of properties experiencing flooding from sewers in the area covering Wootton, Kennington and South Hinksey to the north of the site, in the last 10 years.

Area in Flood Zone 3b	0.00	0

MAIN RIVER

The Upper Thames River flows west to east approximately 1km north of the site. The Moor Ditch flows west to east approximately 1km to the south of the site; this watercourse then flows north to join the Upper Thames. The Ginge Brook flows west to east to join the Upper Thames and is located approximately 1km west of the site.

FLOOD RECORDS

There are historic records of flooding along this part of the river corridor and particularly around the Oday Ditches network to the north west of the site. There are no flood defences present along the part of the watercourse adjacent to the site.

Modelling of the 1 in 100 year storm event as part of the SODC & VWHDC SFRA identifies parts of Sutton Courtenay to the west of the site to be at risk of surface water flooding.

Thames Water has records of properties experiencing flooding from sewers in the Didcot area in the last 10 years.
