1.0 INTRODUCTION

1.1 **Background**

1.1.1 The applicant currently operates a skip waste recycling and transfer facility at Slape Hill Quarry, Glympton, northwest of Woodstock, which is a former limestone working that is in the process of being landfilled. The skip waste recycling operations will need to be removed upon restoration of the landfill site, which is anticipated to be completed in about 4 years time. As a consequence the applicant has identified the need to find another site for re-location of the existing skip waste recycling operations.

1.1.2 On 14 January 2014 the County Council refused planning permission for an application to site a replacement facility on greenfield land known as the Marshes adjoining the applicant's existing haulage yard at Knightsbridge Farm, Yarnton in the Green Belt. The Council considered that an alternative site search provided in support of the application was inadequate, because the evidence in support of discounting other sites was said to be limited.

1.1.3 Consequently a revised site search has been carried out adopting the same methodology that was used by consultants Mouchel in 2010 for a new Council run household waste recycling centre (HWRC) for the North Oxford area. Whilst differing in some respects a HWRC is in principle the same form of development with similar kind of characteristics and potential impacts as a skip waste recycling facility. The site search assessment carried out by Mouchel was submitted in support of a Regulation 3 application for a new HWRC at Langford Lane, Kidlington, on land which is also greenfield and in the Green Belt. The Council considered that the Mouchel site search was an appropriate exercise, which demonstrated the requirement that there were no more acceptable sites than the application site.

1.2 **Search Criteria**

1.2.1 The same search criteria have been used as in the Mouchel study, with some adjustment to fit the particular circumstances of the skip waste recycling facility, all of which have made the requirements for the site less restrictive than in the Mouchel report. The differences are:

- the minimum site size was reduced to the minimum possible that the site could operate under of 0.8 hectares or 2 acres. (The proposed operational area of the Marshes site, not including the access road, is 0.84 hectares).
- the search area was wider at an 16 km radius from St Giles, which is slightly further than the existing distance between this point and the existing Slape Hill site.

- the original search criteria of the site being within 5km of an A road was not used as this was found not to result in the exclusion of any sites in the Mouchel study.
- the requirement that the site should not be within 8km of an existing HWRC was not used, as it was not relevant in this case.

1.2.2 The initial search criteria were therefore:

- Site size minimum 0.8 hectares (2 acres)*.
- Within 16 km of St Giles, Oxford (circular search area).
- All of site in floodzone 1.
- All of site >100m from the nearest dwelling?
- Site is not a proposed housing LDF site?

* It should be noted that where it was evident that sites were below this size, and could not therefore provide sufficient land for the required facility, they were not identified in the table for further examination.

1.3 Objectives of the Study

1.3.1 The key objective of the site search is to find a suitable site to re-locate an existing skip waste recycling, which cannot remain at its current location, in order to maintain and improve upon currently recycling capacity. The new site needs to be suitably located to minimise adverse impacts once operational.

2.0 WASTE PLANNING BACKGROUND

2.1 National Policy

2.1.1 The Government's National Planning Policy Framework (NPPF) was introduced in March 2012. It does not contain specific waste policies, but requires that decisions on waste applications should have regard to policies in the Framework so far as relevant.

2.1.2 The NPPF makes clear at the outset that the purpose of the planning system is to contribute to the achievement of sustainable development, and that there are three dimensions to sustainable development: economic, social and environmental. The economic role is concerned with building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; the social purpose is to support strong, vibrant and healthy communities by creating a high quality built environment which reflects the community's needs; and the environmental role means contributing to protecting

and enhancing the natural, built and historic environment including using natural resources prudently, minimising waste and pollution, and moving to a low carbon economy.

2.1.3 Planning Policy 10: Planning for Sustainable Management (PPS10) contains the Government's current policy on waste management. Paragraph 21 states:

"in deciding which sites and areas to identify for waste management facilities, waste planning authorities should:

(i) assess their suitability for development against each of the following criteria:

- the extent to which they support the policies in this PPS;*
- the physical and environmental constraints on development, including existing and proposed neighbouring land uses (Anne E);*
- the cumulative effect of previous waste disposal facilities on the well-being of the local community, including any significant adverse impacts on environmental quality, social cohesion and inclusion or economic potential;*
- the capacity of existing and potential transport infrastructure to support the sustainable movement of waste, and products arising from resource recovery, seeking when practicable and beneficial to use modes other than road transport.*

(ii) give priority to the re-use of previously-developed land, and redundant agricultural and forestry buildings and their curtilages."

2.1.4 Annex E of PPS10 sets out more specific site suitability criteria.

- a) protection of water resources: proximity of vulnerable surface and ground water;
- b) land instability;
- c) visual intrusion: setting of the proposed location and potential for design solutions to produce acceptable development and need to protect landscapes' of national importance e.g. Areas of Outstanding Natural Beauty (AONB);
- d) nature conservation: adverse effect on sites of international importance;
- e) historic environment and built heritage;
- f) traffic and access: suitability of the road network and reliance on local roads;
- g) air emissions, including dust: proximity of sensitive receptors;
- h) odours: proximity of sensitive receptors;
- i) vermin and birds: proximity of sensitive receptors;
- j) noise and vibration;
- k) litter;
- l) potential land use conflict: likely proposed development in the vicinity of the proposed location.

2.2 Local Waste Planning Policy

2.2.1 The saved policies of the Oxfordshire Minerals and Waste Local Plan (1996) include several that provide guidance on the location of new waste recycling facilities.

“Policy W3

Proposals for re-use/recycling will normally be permitted provided that:

- (a) the site is close to the source of the waste and/or the market for the re-used/recycled material;*
- (b) the site is well related to appropriate parts of the transport network, and located where the number and length of motorised journeys is likely to be minimised;*
- (c) the proposal will not cause unacceptable nuisance in terms of noise, dust, fumes, smell, visual intrusion or traffic;*
- (d) the proposal will not pose an unacceptable risk to the water environment;*
- (e) the proposal does not conflict with Structure and Local Plan policies.”*

“Policy W4

Proposals for re-use/recycling and ancillary processes will not normally be permitted in the open countryside unless:

- (a) there is an established overriding need and there is not other suitable site available and/or,*
- (b) the development is to form part of a mineral extraction/landfill site and will be removed on completion of extraction/landfill.”*

“Policy W5

In all cases waste treatment plant, buildings, machinery and stockpiles must be properly screened from the surrounding landscape. Such screening – by landscaping and other means – should be in place before any waste stockpiling or treatment begins.”

“Policy W6

The County Council will seek to develop a waste reception centre on the north side of Oxford in a manner which encourages recycling of household and minor trade wastes. Subject to there being no more acceptable site on the north of Oxford, and subject to the detail of the development meeting W3(c) and W5, a waste reception centre will be developed at Langford Lane.”

2.2.2 The Council’s draft Minerals and Waste Core Strategy also provides guidance on the siting of waste management facilities.

“Policy W6

Priority will be given to siting waste management facilities on land that:

- Is already in waste management or industrial use; or*

- *Is previously developed, derelict or underused; or*
- *Is an active mineral site; or*
- *Involves existing agricultural buildings and their curtilages; or*
- *Is at a waste water treatment works.*

Proposals for facilities on land that is being used temporarily for another purpose (including mineral working and landfill sites) should include removal of the facility before that temporary use is required to cease.

Waste management facilities will not be permitted on green field land unless there is an over-riding need that cannot be met in any other way.

Within the Green Belt, waste management facilities may be permitted provided that very special circumstances are demonstrated. Proposals for such facilities will need to demonstrate that they are required to serve a recognised need arising in Oxford and that there is no reasonable prospect of a suitable alternative site becoming available outside the Green belt. Controls may be imposed to ensure that such facilities serve a waste management need arising in Oxford.”

3.0 SITE IDENTIFICATION

3.1 The Process of Site Identification

3.1.1 In compiling the long list of potential sites, the same sources of information were looked at as in the Mouchel study, with the exception of the Oxfordshire County Council land terrier plans. The information sources therefore include:

- Commercial property websites and local agent direct enquiries;
- West Oxfordshire District Council Commercial Property Register (June 2014)
- West Oxfordshire District Council Employment Land Audit 2007 and Update November 2012
- Data from the Cherwell/M40 Investment Partnership website
- Direct enquiries with the agents for Thames Water property, West Oxfordshire District Council’s Estates Manager, Oxford City Council’s Major Projects & Disposal Team, Cherwell District Council’s Head of Regeneration & Estates, South Oxfordshire Economy, Leisure & Property Team and Vale of White Horse Strategic Property Team.
- Homes and Communities Agency Surplus Public Sector Land Register (February 2013)
- West Oxfordshire District Local Development Framework Submission Sites
- Cherwell District Local Development Framework Submission Sites
- Oxford City Local Development Framework Allocation Sites

- South Oxfordshire District Local Development Framework Site Allocations DPD Submission Sites
- Cherwell District Adopted Local Plan Allocation Sites
- Cherwell District Non-Statutory Local Plan Allocation Sites
- West Oxfordshire District Local Plan Allocation Sites
- Oxford City Local Plan Allocation Sites
- South Oxfordshire District Local Plan Allocation Sites
- Vale of White Horse Local Development Framework Proposed Allocation Sites
- Vale of White Horse Local Plan Allocation Sites
- Cherwell Employment Land Review (July 2006)
- Cherwell Employment Land Study (February 2012)
- Oxford Employment Land Study 2006
- Oxford Strategic Employment Land Availability Assessment (April 2013)
- South Oxfordshire Employment Land Review (April 2007)
- Vale of White Horse Employment Land Review 2013
- Vale of White Horse and South Oxfordshire Districts Combined Commercial Property Register (April 2014)
- Oxfordshire Local Enterprise Partnership
- Oxfordshire County Council Adopted Minerals and Waste Local Plan Allocation Sites
- Waste Management Licence Sites (from Environment Agency Registers)
- Oxfordshire Minerals & Waste Development Framework – Possible Mineral and Waste Sites
- The ERM 2005 Strategic Waste Recycling Centre Feasibility Study
- Other ad hoc sources

3.1.2 206 additional sites were identified to the 162 sites provided in the Mouchel report, giving 368 sites in total. Each of the sites was assessed against the site search criteria and a new table produced including both the Mouchel sites and the new sites. The Mouchel sites are those where the plan reference numbers are highlighted in yellow in the table at Appendix 1.

3.1.3 The details of the sites identified by Mouchel were reproduced as in their report, with the exception that the responses to the first two criteria of site size and area of search were altered as required to reflect the revised site size and distance of the site search area. As the effect of the revisions to these site search criteria was to make the requirements less restrictive, where adjustments were made, it was always a case of a “no” being changed to “yes”.

- 3.1.4 The only other changes to original Mouchel sites was to correct the response on the 4th criteria in relation to the Old Brickworks Farm site (CL-01/SR-15/121), Yarnton Waste Water Treatment Works (CDD26) to a “no” in accordance with the findings at page 7 of the Mouchel report that the sites were within 100m of a dwelling, which had not been clear at the initial appraisal stage of that study, and when they should have been sieved out. In addition the same correction was made to CLP8, which is Oxford Business Park at Yarnton and is within 100m of a dwelling.
- 3.1.5 The plans of the locations of the Mouchel sites are reproduced at Appendix 2 and the location of the new sites are indicated on the plan at Appendix 3.
- 3.1.6 The short list of sites arising from the site search included those sites, which met all the search criteria. The short list amounted to 25 sites and was as follows:
- | | |
|-------------|---|
| WLP1 | Lakeside Industrial Estate, Standlake |
| WES6 | Eynsham Park Sawmill, North Leigh |
| WES12 | Cotswold Farm, Standlake |
| CDD8/012 | Gosford Grain Silos, Kidlington |
| CDD25/261 | Knightsbridge Farm, Yarnton |
| CDD34 | North of Oxford Gateway and W of A34 |
| CDD50/CLP11 | Begbroke Employment Zone |
| CLP1, 092 | Oxford Spires Business Park, Kidlington |
| CES1/091 | West of Canal, Langford Locks, Kidlington |
| OLP6 | Fenchurch Court, Bobby Fryer Close, Oxford |
| OLP7 | Chiltern Business Centre, Garsington Road, Oxford |
| OES4 | Unipart Site, Garsington Road, Oxford |
| SES5 | Haseley Trading Estate, Great Haseley |
| VWH4 | West of Didcot Power Station, Milton |
| MWLP2 | Land North of Langford Lane, Kidlington |
| MWLP3 | Rail Depot – A4165/A34, Kidlington |
| MWLP6 | Rail Depot, Sutton Courtenay |
| OCC2 | Land at Stratfield Brake, Kidlington |
| SR-14/004 | Slape Hill Quarry, Glympton |
| 070 | Spires Business Park (TWA Depot), Kidlington |
| 003 | Dix Pit, Stanton Harcourt |
| 236 | Controlled Reclamation, Dix Pit, Stanton Harcourt |
| 019 | Bicester Sewage Treatment Works, Bicester |
| 144 | Land east of Didcot Power Station |
| 217 | Culham No.4 Site |

3.2 Initial Option Appraisal

3.2.1 In line with the Mouchel report the short listed sites were assessed more closely against a set of further sieving criteria, as part of the initial stages of a draft option appraisal. The draft option appraisal criteria were as follows:

- Housing proximity
- Economics of developing a suitable site
- Highways - accessibility and technical issues (getting to site and access to site/visibility)
- Proximity to end processing plant/facilities
- Landscape and environmental issues
- Deliverability within timescales/availability
- Area of demand/service location requirement – proximity to main population centre
- Existing/allocated land use type

(NB. Distance to an A road was not included for the reasons given at paragraph 1.2.1 above.)

3.3 Final Option Appraisal

3.3.1 This lead to the following sites being sieved out, for the reasons given below:

- Site WES6 - Eynsham Park Sawmill, North Leigh is fully occupied as a sawmill and there is no other space on the site.
- Site CDD8/012 - Gosford Grain Silos, Kidlington is being developed for a new railway station.
- Site CES1/091 - West of Canal, Langford Locks, Kidlington has insufficient space remaining on the site.
- Site OLP6 - Fenchurch Court, Bobby Fryer Close, Oxford consists of occupied small industrial buildings and there is no other space available on the site.
- Site OLP7- Chiltern Business Centre, Garsington Road, Oxford consists of occupied small industrial buildings and there is no other space available on the site.
- Site OES4 - Unipart Site, Garsington Road, Oxford is fully occupied as the headquarters of a major concern and there is no other space available on the site.
- Site SES5 - Haseley Trading Estate, Great Haseley has no space remaining on site.
- Site MWLP3 - Rail Depot – A4165/A34, Kidlington is required (and safeguarded as a minerals rail depot and there is insufficient space remaining on the site.
- Site SR-14/004 - Slape Hill Quarry, Glympton is the site for which a replacement facility is required, and will shortly be no longer available.

3.3.2 The final short list of 16 sites was:

WLP1	Lakeside Industrial Estate, Standlake
WES12	Cotswold Farm, Standlake
CDD25/261	Knightsbridge Farm, Yarnton
CDD34	North of Oxford Gateway and W of A34
CDD50/CLP11	Begbroke Employment Zone
CLP1/092	Oxford Spires Business Park, Kidlington
VWH4	West of Didcot Power Station, Milton
MWLP2	Land North of Langford Lane, Kidlington
MWLP6	Rail Depot, Sutton Courtenay
OCC2	Land at Stratfield Brake, Kidlington
070	Spires Business Park (TWA Depot), Kidlington
003	Dix Pit, Stanton Harcourt
236	Controlled Reclamation, Dix Pit, Stanton Harcourt
019	Bicester Sewage Treatment Works, Bicester
144	Land east of Didcot Power Station
217	Culham No.4 Site

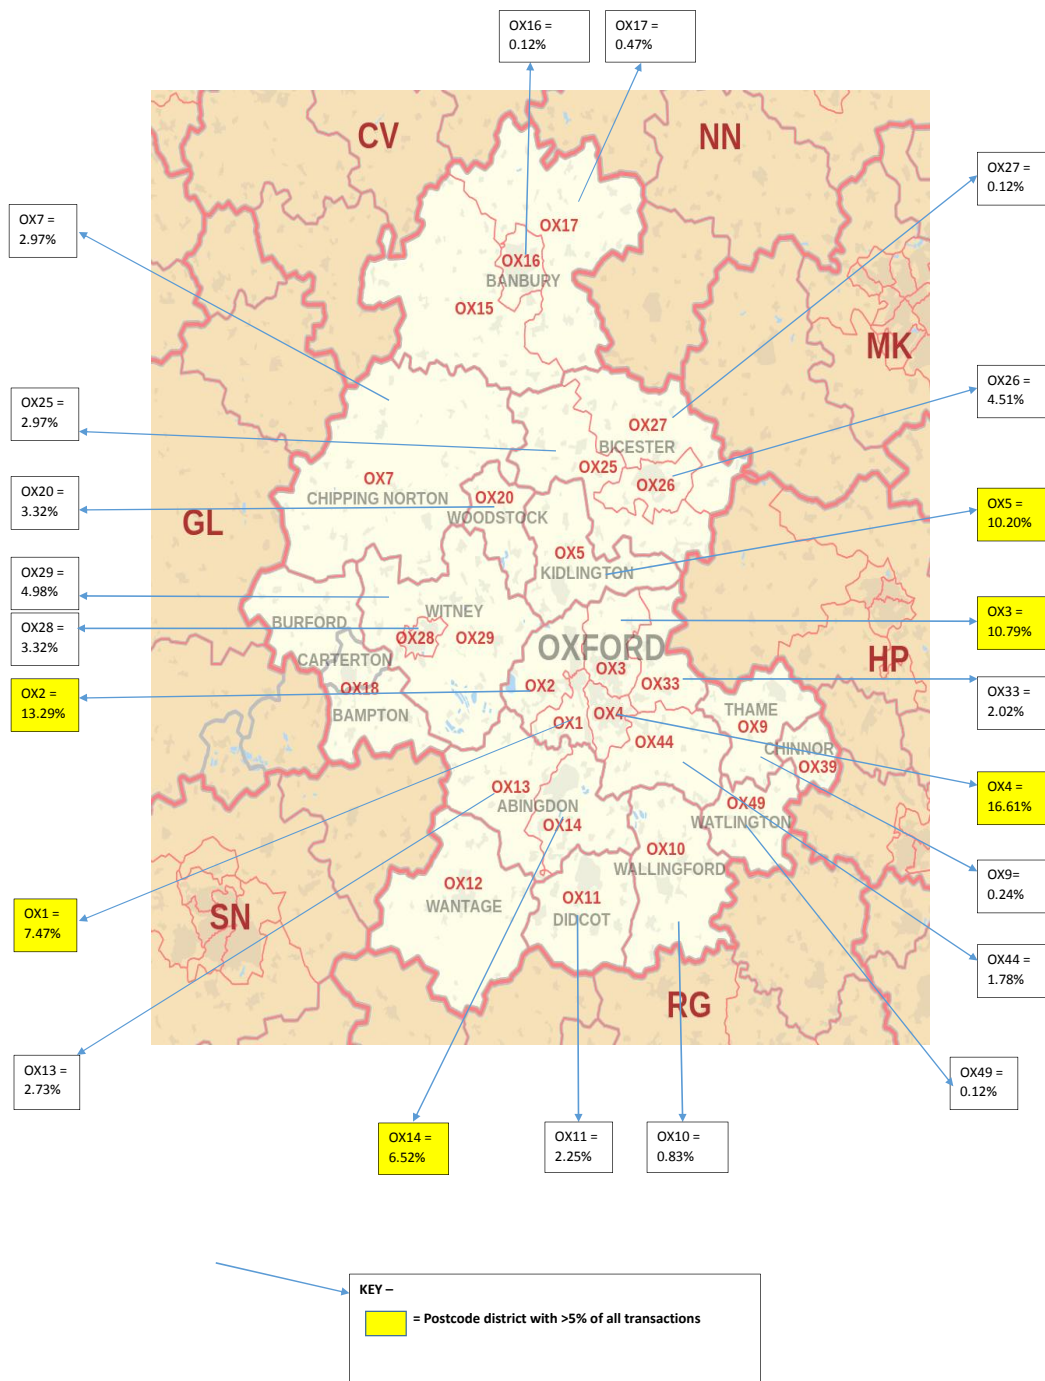

3.3.3 The final criteria for comparing the performance of the sites, again following the Mouchel assessment approach, were:

- Housing amenity assessment
- Economics of developing a suitable site
- Highways – accessibility and technical issues (getting to site and access to site/visibility)
- Proximity to end processing plant/facilities
- Landscape and environmental issues
- Deliverability within timescales/availability
- Area of demand/service location requirement – proximity to main population centre
- Existing / allocated land use type

3.3.4 With regard to the area of demand/service criterion, the Mouchel study considered the proximity to Pear Tree Roundabout. However, this is not relevant to a replacement facility for the skip waste recycling operations at Slape Hill.

Therefore the proximity to the central point of the site search of St Giles, Oxford (first of the initial sieving criteria) has been adopted.

SHEEHAN HAULAGE AND PLANT HIRE – SKIP TRANSACTIONS BY POSTCODE MARCH 2014

3.3.5 In order to ascertain the robustness of this assumption that St Giles is the central point of the appropriate area of demand/service, the skip transaction data for the month of March 2014 has been analysed by postcode. As demonstrated by the map above this demonstrates that the postcodes with >5% of all transactions are the OX1-OX5 Oxford City and Kidlington postcodes plus OX14 Abingdon. This accounts for 65% of the waste and confirms that the identified point for assessing proximity to demand/service is appropriate.

3.3.6 The final shortlist of sites has then been scored against the option appraisal criteria using the approach adopted in the Mouchel study, where the criteria were weighted to emphasise the criteria considered to be the most important, which were the economics of development and deliverability. Furthermore the sites have also been scored using no weighting of criteria at all. The option appraisal tables are at Appendix 4. The results of the two approaches are reproduced in the tables below.

TABLE 1

SITE REF	OPTION	TOTAL	RANKING
CDD25/261	Knightsbridge Farm, Yarnton	390	1
MWLP2	Land North of Langford Lane, Kidlington	380	2
OCC2	Land at Stratfield Brake, Kidlington	360	3
CDD34	North of Oxford Gateway and W of A34	330	4
070	Spires Business Park (TWA Depot), Kidlington	320	5
CLP1/092	Oxford Spires Business Park, Kidlington	310	6
236	Controlled Reclamation, Dix Pit, Stanton Harcourt	310	6
CDD50/CLP11	Begbroke Employment Zone	290	8
019	Bicester Sewage Treatment Works, Bicester	290	8
VWH4	West of Didcot Power Station, Milton	280	10
144	Land east of Didcot Power Station	280	10
003	Dix Pit, Stanton Harcourt	270	12
WLP1	Lakeside Industrial Estate, Standlake	260	13
WES12	Cotswold Farm, Standlake	260	13
217	Culham No.4 Site	260	13
MWLP6	Rail Depot, Sutton Courtenay	240	16

TABLE 2

SITE REF	OPTION	TOTAL	RANKING
CDD25/261	Knightsbridge Farm, Yarnton	300	1
MWLP2	Land North of Langford Lane, Kidlington	290	2
OCC2	Land at Stratfield Brake, Kidlington	280	3
070	Spires Business Park (TWA Depot), Kidlington	250	4
CDD34	North of Oxford Gateway and W of A34	250	4
CLP1/092	Oxford Spires Business Park, Kidlington	250	4
VWH4	West of Didcot Power Station, Milton	240	7
236	Controlled Reclamation, Dix Pit, Stanton Harcourt	240	7
CDD50/CLP11	Begbroke Employment Zone	230	9
019	Bicester Sewage Treatment Works, Bicester	230	9
WLP1	Lakeside Industrial Estate, Standlake	220	11
003	Dix Pit, Stanton Harcourt	220	11
WES12	Cotswold Farm, Standlake	210	13
144	Land east Of Didcot Power Station	210	13
217	Culham No.4 Site	200	15
MWLP6	Rail Depot, Sutton Courtenay	200	15

3.3.7 Both tables demonstrate that the Knightsbridge Farm site (CDD25/261) scores highest with land at Langford Lane (MWLP2/181) next, followed by Land at Stratfield Brake (OCC2).

3.3.8 The Knightsbridge Farm site was not included in the shortlist of sites carried out by Mouchel, because the existing yard (CDD25), at 1.04 hectares fell below the minimum size required, and they would not have been aware of the nomination as a waste site of the adjoining land at the Marshes (261). It was nominated in October 2010, shortly after the Mouchel site search was carried out in September 2010.

3.3.9 The Mouchel report explains in more detail that there are issues with the Council's intentions for the Stratfield Brake site as a bio fuel crop site and with difficulties in providing a safe and convenient access into the site. There are no such difficulties with the Knightsbridge Farm site. In addition it should be noted that the proposal for a HWRC site on the land north of Langford Lane is now not to happen due to difficulties that have arisen in delivering the site. It is understood that the landowners are not able to show title to all the land, in particular a strip of land adjoining the roadside, which means that the proposed access to the land would not be secure.

- 3.3.10 Furthermore both the Langford Lane and Stratfield Brake sites are highly visible and do not have the enclosure and screening from views that the Knightsbridge Farm benefits from. There is in addition a public footpath running along the eastern edge of the Langford Lane site. Stratfield Brake also lies in the important strategic gap of open land between Oxford and Kidlington, and as the Mouchel report records was originally purchased by the County Council to safeguard the land in the interests of deterring coalescence between the settlements.
- 3.3.11 All three top sites are in the Green Belt, as are the next two highest ranked sites, North of Oxford Gateway and W of A34 (CDD34), and Oxford Spires Business Park (TWA Depot), Kidlington (070).
- 3.3.12 North of Oxford Gateway and W of A34 (CDD34) is a very open greenfield site, highly visible from the A34 and A40, and is unlikely to have an access solution that would be acceptable to the Highways Authority. The existing field entrance onto the A40 is below the A34 flyover, because of the A40 needing to rise from this point to bridge the railway line to the west. Providing a safe and convenient access would therefore be very difficult. There would also be problems with visibility and with traffic queuing towards the Wolvercote roundabout to the east. The site is very close to the Oxford Meadows SAC, and as such may well have adverse implications for the European site's conservation objectives.
- 3.3.13 With regard to the Oxford Spires Business Park, (TWA Depot), Kidlington (070), it has transpired since the original final option appraisal was carried out in June 2010, that the site is not operationally available. (See email response from Thames Water property agents at Appendix 5). In any event it is not clear whether sufficient space would be available on the site. Furthermore the volume of traffic associated with the proposed facility, which would have to travel through the business park and past the airport entrance, is likely to give rise to amenity and safety issues.
- 3.3.14 Of the other sites identified in the final shortlist there are serious issues relating to their availability and/or development requirements, which would make them unviable as options. These sites are:
- Lakeside Industrial Estate, Standlake (WLP1), which is piled up with a huge quantity of unauthorised waste, which needs removing and makes development of the site cost prohibitive;
 - Cotswold Farm, Standlake (WES12), which is permitted for B8 only, and the existing buildings would need to be demolished in addition to a change of use;
 - Oxford Spires Business Park, Kidlington (CLP1/092), which has permission and is being marketed for a high quality office building;

- Begbroke Employment Zone (CDD50/CLP11), which is a Science Park designated for research and development;
- West of Didcot, Milton (VWH4), which is part of a proposal for a new business park, recently recommended for approval;
- Rail Depot, Sutton Courtenay (MWLP6)), which is operational as and safeguarded as a minerals rail depot, with large stockpiles of material, and would not be not be available within the required timescale; and
- It is now apparent that, as with the Oxford Spires Business Park, (TWA Depot), Kidlington (070), the Bicester Sewage Treatment Works, Bicester (019) is not available. (See email from Thames Water property agents at Appendix 5).

3.3.15 Of the remaining sites they are either greenfield or Green Belt and are also in locations which are not well located to the market and/or processing facilities, which would introduce significant disbenefits in terms of the operation's carbon footprint. This is demonstrated by the plan at Appendix 6, which maps the location of the 16 final shortlisted sites. The sites at Dix Pit, Stanton Harcourt (003 and 236) are the closest of the non-green belt sites, but are some 17 km from St Giles in terms of actual road distance, and the Council would seek routeing via Witney, effectively taking the sites out of the search area. The potential alternatives are therefore not an improvement (even when compared with the existing facility at Slape Hill Quarry) and none of them would offer a preferable or more suitable option.

3.3.16 Overall, given the established need for the recycling capacity to continue, and the demonstrated need to provide a sustainable service to Oxford, justification can therefore be made for a Green Belt site, and the Marshes at Knightsbridge Farm would be the least harmful Green Belt option. Indeed it scores higher than the Green Belt site that was selected for the Council's own proposed waste recycling centre and scores considerably higher than any of the non-Green Belt options.

4.0 CONCLUSIONS AND RECOMMENDATIONS

4.1 **Conclusions**

4.1.1 368 sites were assessed against the search criteria contained in the tables at Appendix 1 and their locations are plotted on the plans at Appendices 2 and 3.

4.1.2 Following from the initial site search process a number of short listed sites were scored against criteria in a draft option appraisal.

4.1.3 Following further review of the draft appraisal criteria and further research into some of the short listed sites, a final set of short listed sites was produced, and each site was subjected to the final weighted and non-weighted option appraisal criteria (Appendix 4). This led to the final ranking of the top three sites, as follows:

- 1st Knightsbridge Farm, Yarnton
- 2nd Land North of Langford Lane, Kidlington
- 3rd Land at Stratfield Brake, Kidlington

3.3.17 The scoring in the ranking of the top three sites was not far apart, but there are issues with the second and third ranked sites, which clearly discount them from displacing the first choice. These issues are that the second choice, Langford Lane, is no longer available and would in any event have had consequences in visual, landscape terms that are not characteristic of the first choice site at Knightsbridge Farm. Alternatively the third choice of Stratfield Brake provides an important area of open land within the strategic gap between Oxford and Kidlington and its development would also have greater landscape and visual impacts than the Knightsbridge Farm site. There would also be difficulties in providing a suitable access to the Stratfield Brake site, which is not the case with the Knightsbridge Farm site.

4.2 Recommendations

4.2.1 In consideration of the above it is recommended that the site at the Marshes, Knightsbridge Farm should be pursued. It performs best having regard to the criteria agreed by the County Council in their search for a new waste recycling centre for the North of Oxford.

Waste Recycling and Transfer Station, The Marshes, Yarnton - Alternative Site Search: Central Oxfordshire

Suzi

I am afraid that neither are operationally available or have a planning permission that would facilitate development.

Regards

Steve

P Before printing, think about the environment

Dear Barden

I was wondering whether you could back to me on this.

Many thanks
 Suzi Coyne
