at its junction with St Clement's Street.**

Director name Bill Cotton
Directorate Environment & Place

Dear resident, business, or organisation

14 June 2024

Notification of work at the junction of Jeune Street and St Clement's Street

We are writing to let you know that Oxfordshire County Council (OCC) will be carrying out some minor works on Jeune Street at the junction with St Clement's Street in the morning and afternoon on the **2nd and 3rd of July** (weather permitting). These works will include the introduction of wooden, lockable bollards in the carriageway and the re-arrangement of parking spaces at the northern end along with associated signs and road markings adjustments.

The works are in response to longstanding concerns from residents on Jeune Street about vehicles contravening the existing no right turn prohibition at the junction, the contravention of the one-way street and the speed of vehicles using Jeune Street.

As you may be aware, on 12 October 2023 a decision was made to retain the east Oxford low traffic neighbourhoods (LTNs) with some amendments to improve their operation.

This includes the prohibition of motor vehicles from entering or exiting Jeune Street at its junction with St Clement's Street. Non-motorised traffic including cycles and the public hire Voi e-scooters will remain unaffected by these new access arrangements, apart from the existing no right turn prohibition.

Emergency services and public service vehicles will have access through the restriction as they do for other bollards in the low traffic neighbourhoods.

To support this, the existing one-way system will be changed to two-way with general motor traffic access from the Cowley Road only.

The location of parking spaces close to the junction will also be adjusted slightly to accommodate suitable turning space at the St Clement's Street end of the road.

Please could you help to ensure that the area between 11a Jeune Street up to and including the St Clement's Street junction (on both sides of the road) is free of vehicles between 7.30am and 4pm on both the 2nd and 3rd July for the contractor to carry out the works as quickly and smoothly as possible. We will endeavour to keep disruption to a minimum.

Thank you for your patience and cooperation. If you have questions or concerns about the scheme, please do not hesitate to contact us using the details below.

Yours faithfully,

East Oxford LTN team
